

Cost-efficient and
maintenance-free
vibration protection

Worried About Vibrations?

Do you (still) worry about capillary vibrations and cell safety?

Antivibration tables offer good protection from external vibrations. However, if you are looking for cost-efficient basic, low-maintenance, or additional vibration protection, Antivibration Pads from Eppendorf are a solid choice. They are easy to install under the base of the microscope to protect your microscope and its components from external oscillations and vibrations.

For increased reproducibility of your micromanipulation results

- > Easy to install as a stand-alone or as an addition to your antivibration table
- > Five models available optimized for different weights below individual microscope basis
- > No gas supply necessary
- > No maintenance required
- > Low weight (750 g) and portable
- > Space-saving

Antivibration Pads

Find the right set of Antivibration Pads for your microscope Set-up

For optimal performance, the weight under all individual three/four microscope feet (complete workstation incl. all add-ons) must be measured and Antivibrations Pads according to this weight must be chosen.

Below, you can find the recommended sets of Antivibration Pads for the basic models of various microscope models (no heavier add-ons, e.g. motorized stage, fluorescence light source, cameras).
